Have you Thought About a Career in Healthcare?

Job shadowing helps you explore your options. Spend time observing healthcare professionals at their job doing what they do. Build your resume, network with future employers, and determine whether the career is right for you.

Why Job Shadow in Healthcare?

Healthcare is experiencing workforce shortages. It is projected that 1/3 of all new jobs created in the U.S. will be in healthcare and the lowest rates of unemployment can be found in healthcare.

Shadowing a professional is most important in the beginning of a career search.

Job shadowing is a win-win situation for both you and the healthcare professional. Everyone involved wants your experience to be worthwhile and interesting.

Job shadowing is the link between what you learn in school and future careers.

Job shadowing answers the commonly asked question: "Why do I want to be a _____?"

Job shadowing can open a window into the exciting world that healthcare offers.
